PROJECTS

EMart

- An Ecommerce web app for purchasing different wearables.
- You can filter various products by ratings, price, availability, and delivery.
- It also has features for adding to a cart, searching for products, logging in, etc.
- Have used React, Redux Toolkit, REST API, Express, and MongoDB

CryptTracker

- The basic work of the project is to keep track of various cryptocurrencies in terms of their price, volume, market capitalization, and price change.
- You can filter the currencies by price, volume, price change, etc.
- You can also set the initial number of currencies and can search for a particular currency
- Have used Coin Gecko AP, React, Javascript, HTML, and CSS

DailyJournal

- A web app where you can keep track of various memorable events.
- You can add, search, update, or delete any event.
- Have used Express, MongoDB, and Bootstrap
